DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 9/03/2002 has been considered by the examiner.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-8, 11, 12 and 16-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ravier et al. (5933084).

Refer to figures 1 and 3.

4. Claims 1-8, 11, 12 and 16-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Magee (5644431).

Refer to figure 6.

Allowable Subject Matter

5. Claims 9, 10 and 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2873

6. The following is an examiner's statement of reasons for allowability: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in claim(s) 9, 10 and 13-15, wherein the claimed invention comprises images centered directly under each lens of the lens array, the images are shifted horizontally in relation to the lenses of the lens array, or the lenses of the lens array or non-focusing, as claimed. The combination of all the claimed features are not anticipated or made obvious by the prior art.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following reference are cited for disclosing a lenticular array having images adjacent to lenticular substrate/elements or disclosing a flat portion between a lenticule in a lenticular array: Fotland et al. (), Rosenthal (5642226) and Young et al. (5699190).
